

Approved with corrections 02/15/2018

Plainfield Energy Committee Meeting 1/10/18
Minutes

In Attendance: Tim Walter, Conrad Liebenow, Judith Williams, Stephen Bushway

Meeting convened at 7:05.

Minutes of the 12/13 meeting were read and accepted with corrections.

Steve will call Renee Schmitt about joining the committee.

There will be a meeting next Tuesday, 1/16 at 3PM starting at the Public Safety Complex with World Energy auditor, Bob Haynes to finalize details for updated lighting at the Safety Complex, Town Hall, and Hallock Building.

Regarding a roof mounted array at the Safety Complex:

We are waiting to hear from a structural engineer from Springfield who stamped the blueprints of the building. Some loads were omitted (sprinkler system) and some added (hanging air cleaner units). A pv array adds an additional 2-3 lbs./s.f. to the roof load.

E.C.M.'s at the Highway Garage:

On 12/15/17 Conrad, David Alvord and Brad Airey of Guardian Energy met at the Highway Garage to see what measures and costs Guardian would propose for ECM's for the building.

A motion was made and 2nded to use money from the PAB Solarize program to pay the \$144.50 bill for copies of as-built construction drawings of the Safety Complex to determine if the roof could support a solar array. Motion passed unanimously.

The future of the Nexamp large scale solar project is uncertain at this point.

Our next meeting was moved from Wed. 2/14 to Thursday, 2/15 to avoid meeting on Valentine's Day.

Meeting adjourned at 8:51.

Respectfully,
Stephen Bushway
