PEC Meeting Minutes
7/10/19

Convened at 7:10 PM
Attending Tim, Conrad, Renee and Steve

Minutes of the 6/12/19 meeting were read and accepted.

We discussed the process by which the Town hires a pv contractor to install a pv system on the Hallock building. Aaron Simms has done a lot of work for the town to date and has recommended we adopt Goshen's RFP which he thought was well written. We are looking at a 12 kW, DC system (40 panels) on the front roof at an estimated cost (extrapolated) of \$37,000.

We do need to wait for a structural analysis of the roof.

We recommended by vote to have a pv system installed on the front pitch roof the Hallock Building pending structural analysis.

Tim and Conrad will ask to be put on the agenda for the next meeting of the building committee to make the Hallock Building pv system recommendation.

Meeting adjourned at 8:20
