PEC Meeting Minutes

14 August 2019

Convened at 7:15PM

Attending Tim, Conrad, Renee

Minutes of 7/10/19 meeting were read and accepted.

Conrad talked to Jean Pfister about possible Green Community payments for structural improvements on the highway garage to support solar. However Peter Lapointe of the building committee reported that structural improvements would cost about \$60,000. 3 phase power would be about \$10,000.

The building committee has picked the contractor for the new roofing on the Hallock Building, and it should be completed in about a month, i.e. ~ September.

SunBug estimated it would cost \$45,000 for 44 LG 335 watt roof mounted panels on the Hallock building. This would be a 14.74 kilowatt DC system that would produce 15,000 kilowatt hours annually. It might cost \$1,200 more to mount snow guards.

The Solar Store estimated that it would cost \$42,940 for a single tracker, 24 Panasonic 335 watt modules ground mount system, 8.04 kilowatt DC in size and would produce 12,400 kilowatt hours annually.

Other discussions were deferred.

Meeting adjourned at 8:07

Respectfully submitted,

Tim Walter
